

ALI RAZA

MERN Stack Developer

☎ +92-3033997540 ✉ aliraza.email512@gmail.com 🔗 linkedin.com/in/aliraza62

Summary

Full Stack Developer with 2+ years of professional experience building secure, scalable, and user-focused web applications. Currently developing advanced EHR and EMR solutions using Next.js at OHS Technologies, with expertise in creating intuitive interfaces, integrating backend services, and ensuring compliant handling of sensitive healthcare data. Proficient in React.js, Next.js (SSR), RESTful APIs, and both SQL and NoSQL databases. Experienced in implementing AI-powered features using OpenAI's API to add intelligent and interactive elements to applications. Strong background in Agile/Scrum workflows and SDLC best practices.

Technical Skills

Frontend: React.js (Hooks, Context API), Next.js (SSR/SSG), Redux (Redux Toolkit), JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Bootstrap, Material UI

Backend & Databases: Node.js, Express.js, MongoDB, PostgreSQL, MySQL, RESTful APIs

AI & Integrations: OpenAI API, AI-powered feature implementation, streaming responses

Tools & Practices: Git, GitHub, GitHub Actions (CI/CD), Agile/Scrum, SDLC, Jira, n8n, Vercel, Netlify

Testing: Jest, React Testing Library, React Query, Axios

Experience

Next.js / Full Stack Developer

Sep 2024 – Present

OHS Technologies

Rahim Yar Khan, Pakistan – Remote

- Contribute to the development of advanced EHR and EMR solutions using Next.js, focusing on secure and efficient management of sensitive patient data in a compliance-driven environment.
- Design and implement user-friendly interfaces with React.js and Next.js (SSR), translating complex healthcare workflows into intuitive UI experiences across 15+ dynamic modules.
- Managed frontend state using Redux Toolkit and React Query, improving data consistency and reducing prop-drilling complexity across the application.
- Integrated RESTful APIs and MongoDB via backend endpoints; collaborated with backend team on database query optimization and schema design.
- Implemented role-based UI rendering with JWT tokens, ensuring secure access control for 5 user roles (Admin, Doctor, Nurse, Patient, Billing Staff).
- Followed Agile/Scrum ceremonies with 2-week sprints, code reviews, and SDLC documentation standards using Git, GitHub, and Jira.

Full Stack Developer

Feb 2024 – Jul 2024

DEVIX.AI

Islamabad, Pakistan – On-site

- Built responsive SPAs and full-stack web applications with React.js and Next.js (SSR), translating Figma designs into pixel-perfect, cross-browser interfaces.
- Developed backend APIs using Node.js and Express.js, integrating PostgreSQL and MongoDB databases for efficient and scalable data handling.
- Integrated OpenAI's API to implement AI-powered features, enabling interactive chat functionality and intelligent user experiences.
- Set up GitHub Actions CI/CD pipelines for automated testing and deployment; maintained 80% test coverage using Jest and React Testing Library.
- Worked in an Agile team with daily standups, sprint planning, and retrospectives, consistently delivering features on time with high code quality.

MERN Stack Intern

Nov 2023 – Jan 2024

CodeZac Pvt Ltd

Islamabad, Pakistan – On-site

- Gained hands-on experience with the MERN stack by writing backend routes, working with RESTful APIs, and making frontend updates using React and Redux.
- Worked with MongoDB and Mongoose for database management; assisted in MySQL-based database design discussions.
- Participated in Agile ceremonies, Git workflows, and pair programming using Jira for task management, building strong team collaboration habits.

Featured Projects

Vista EHR – Healthcare Platform | *Next.js, React.js, Redux Toolkit, MongoDB, Node.js*

- Built a full-stack healthcare platform with Next.js (SSR) and Redux state management, serving secure RESTful API calls to a MongoDB backend.
- Implemented role-based access control, appointment scheduling, and paginated data tables to support multi-role healthcare workflows.
- Followed Agile/Scrum methodology with bi-weekly sprints, user stories, and task tracking in Jira.

G Tire – E-commerce Platform | *React.js, Redux, Node.js, PostgreSQL*

- Developed product catalog, cart, and checkout modules with React and Redux; integrated Node.js backend APIs with PostgreSQL for product filtering and sorting.
- Demonstrated strong problem-solving in API error handling and database query optimization for improved performance.

GB Meals – AI Meal Planner | *React.js, Redux, MongoDB, OpenAI API*

- Created a multi-step form wizard with real-time validation; stored user preferences in MongoDB via backend API.
- Integrated OpenAI API streaming responses to deliver real-time AI-generated meal plans, enhancing user experience with intelligent features.

Education

Bachelor of Science in Computer Science

PMAS Arid Agriculture University

2019 – 2023

Rawalpindi, Pakistan
